

Part One

Date:

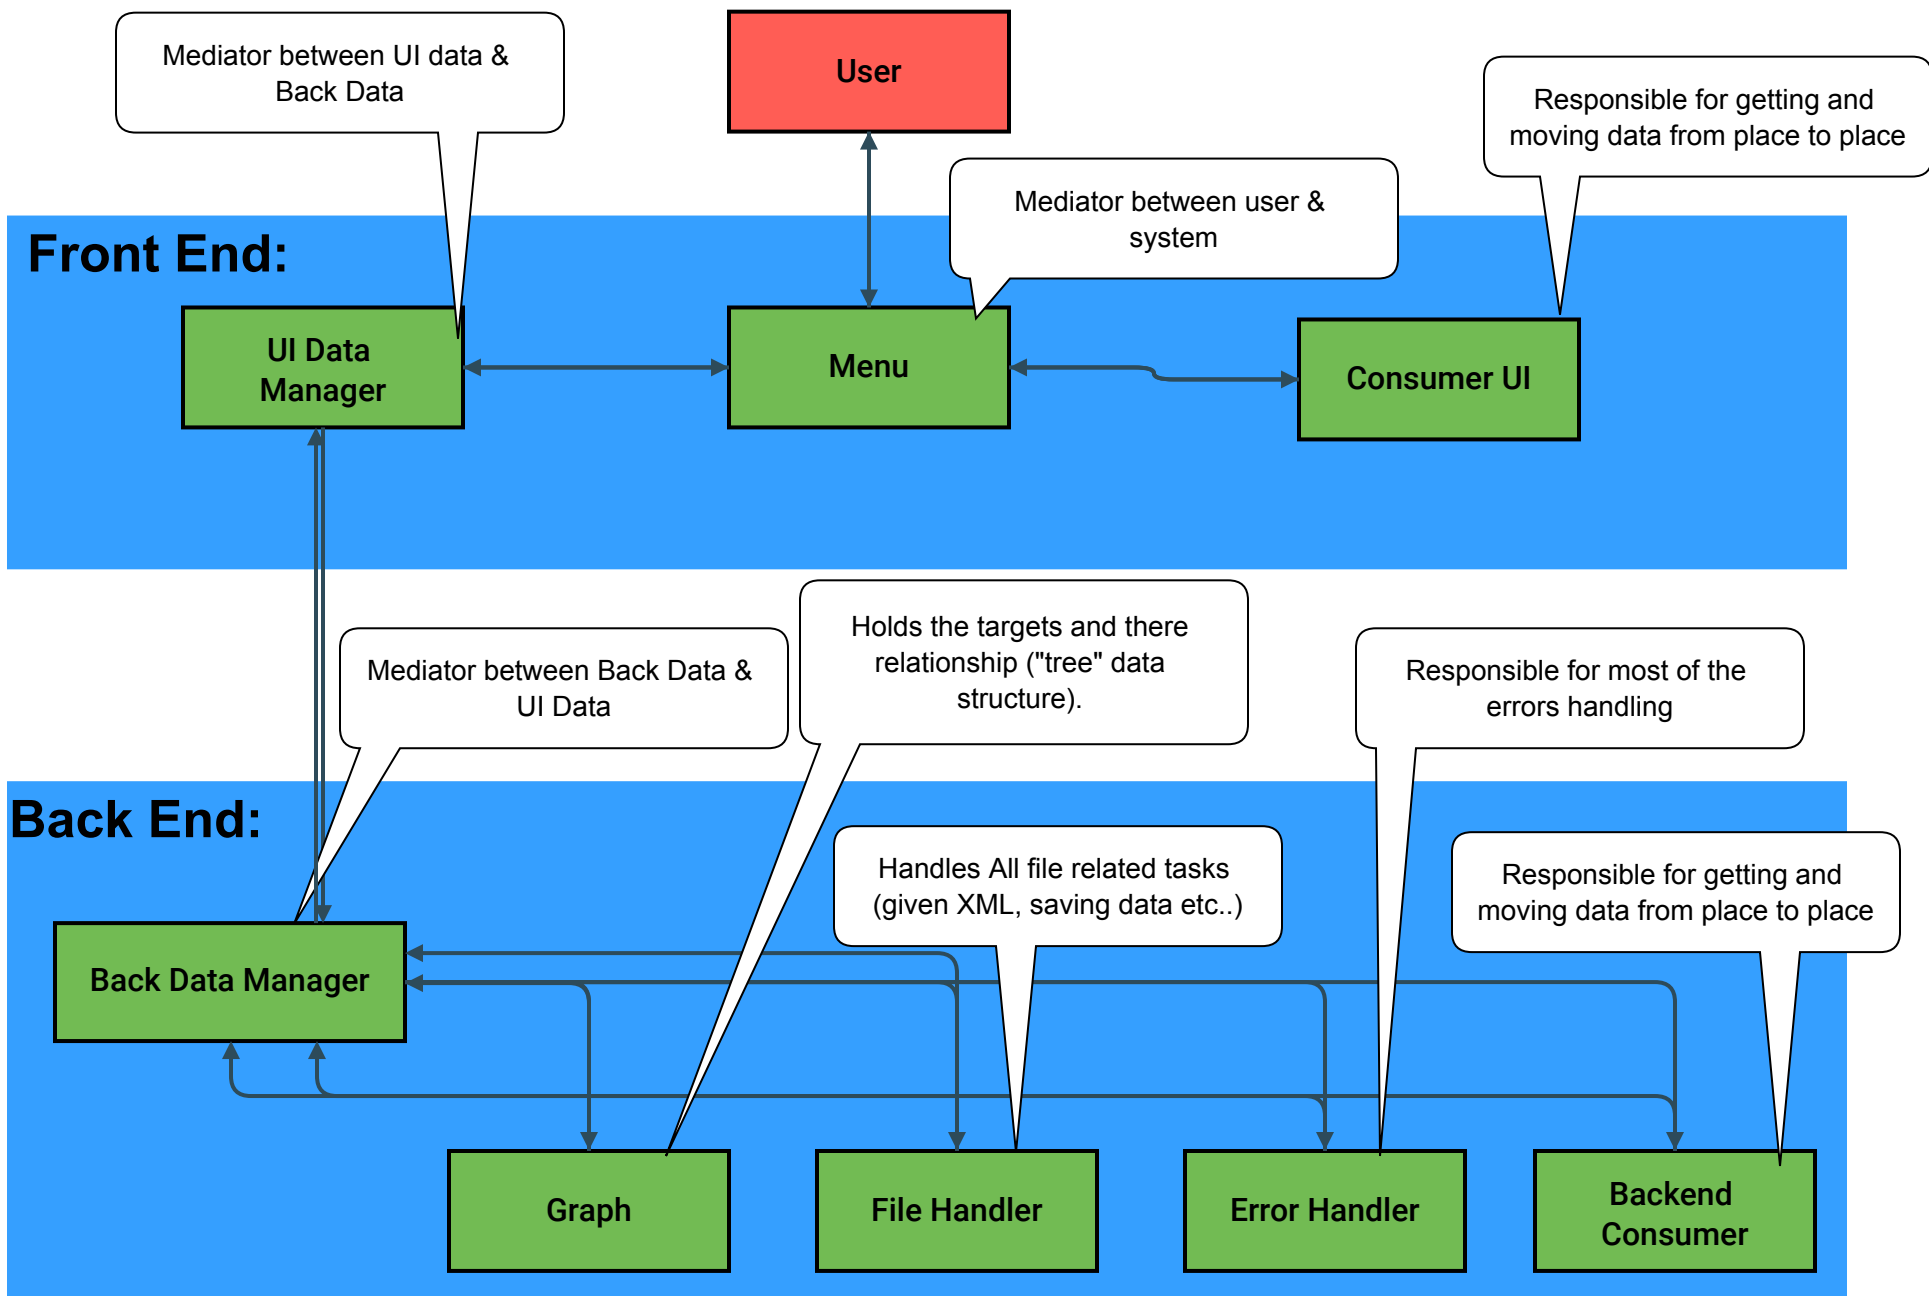

27/11/2021

Persona Info:

- Guy Yomtovian, ID - 206821019 , Email - guyyomtov13@gmail.com
- Nadav Spier, ID - 205784135, Email - herspier@yahoo.com

Data Structure:

*Some of the objectives that are represented here contain objects inside of them

A short explanation.. "the ifs and whys":

We built our data structure in this way, with the goal of having an easy adapting back end, a back end which can deal and work with different front Ends.

Each kind of front end will work with the 'BackDataManger' as a mediator. He knows to start our data structure by getting inputs by a few different ways, he questions the data structure, produces different insights & outputs it to the front end in a simplified way.
